DETECT
# THE UNDETECTED

Enhance your ability to detect colorectal cancer early - with Artificial Intelligence (AI).

GI Genius™
intelligent endoscopy module

The GI Genius™ intelligent endoscopy module - powered by AI - offers a transformative solution that:

- May offer a reliable and ever-vigilant second observer
- Works in real-time to automatically identify and mark abnormalities consistent with colorectal polyps, including those with flat (non-polypoid) morphology
- Seamlessly integrates with your existing colonoscopy equipment and workflow

Artificial Intelligence. Real Results.
